

Deliver Projects Better, Faster, Together

LEAN CONSTRUCTION IRELAND CORPORATE MEMBERSHIP

Dear Colleague

Lean Construction Ireland (LCi) was established in early 2014 to advance the adoption of Lean thinking and Practices across the Irish construction sector.

Invitation to Become a Corporate Member of Lean Construction Ireland

The Irish construction sector is looking for LCi to extend and advance its reach and offerings. To best respond to this request, and to make the step-change in our evolution and development, LCi took the strategic decision to become a legal entity and in March 2018 we became an incorporated not-for-profit organisation. We have put in place a Board of Directors whose members are representatives from across the Irish construction sector who are committed to supporting the sectoral understanding of Lean, and demonstrate the benefits of adopting Lean thinking and practices.

The support of corporate members is integral to enabling Lean Construction Ireland provide its core services and play its key role in enabling the transformation of the Irish construction sector. In this regard, the LCi Board invites your organisation to become a Corporate Member of LCi and a key supporter of our mission and vision to transform the Irish construction sector through the adoption of Lean thinking and practices. Table 1 below highlights LCi's core value-adding services.

Table 1. Lean Construction Ireland Value-Adding Services

Services	Value-Add
LCi Website	The portal and repository for general information on Lean Construction, advice and direction on how to get going on Lean, details on various LCi and related Lean events and webinars, directory of LCi commended service providers, LCi commended capabilities in Lean Construction, etc.
LCi Annual Conference	A world-leading international conference on Lean in Construction with presentations and discussions from national and international thought leaders, subject matter experts, and industry practitioners.
LCi Annual Book of Cases	A first of its kind in the world, this book of case studies from across the Irish construction value-chain provides clear and simple examples of Lean being applied on capital projects as well as internally within organisations themselves.

Directors:

Mr Richard Fitzpatrick (Chair); Ms Angelyn Rowan; Mr Kevin White; Mr Joseph O'Sullivan; Mr Perry Haughton; Mr Gary Widger; Mr Richard Casey; Ms Elizabeth Wheeler; Dr Derek Sinnott; Mr Trevor McSharry; Mr Jason Casey; Mr Denis Leonard (British); Dr Avril Behan; Mr Niall Stone

Registered Office:

Lean Construction Ireland, C/O Eversheds Sutherland, One Earlsfort Centre, Earlsfort Terrace, Dublin 2, Ireland

Webinars	Live webinars on relevant and cutting-edge Lean construction themes and topics delivered by recognised subject matter experts and experienced practitioners.
Events	Information and knowledge exchange community and regional events run throughout the country in collaboration with Regional Lean Networks and other State, academic, representative, and industry stakeholders.
Advocacy Forum	A stakeholder-representative national think-tank and forum advocating for the adoption of Lean thinking and practices throughout the end-to-end value chain of the Irish construction sector.

Table 2 below provides an overview of how Lean Construction Ireland compares to other Lean Construction Institute communities of practice elsewhere in the world.
